Svetlana Zharskaya

Product Design • AI • SaaS B2B • Mobile apps

Product Designer working at the edge of AI, complex B2B systems, and mobile apps. I shape products, influence strategy, and raise the bar for how design works, not just what it looks like. Deep experience in Human-AI interaction, 0→1, and leading design across multiple product lines.

WORK EXPERIENCE

2025–Present

Freelance Product Designer

- Defined interaction and trust patterns for **AI-powered products**
- **Partnered** with **Product** and **Engineering** to turn AI capabilities into things people actually want to use
- **Embedded AI** into my own **design process** (prototyping, automation, faster cycles)

2022–2025

Manager, Product Design at EVBox

- Built and led the **design function** across **4 product lines** (B2B web, mobile, embedded UI)
- Shaped **design strategy** and practice org-wide, not just within the team
- Grew **team retention** to **100% over 2+ years** (was 42% before)
- Embedded **user insights** into **product strategy**, influencing **roadmap** priorities and feature scope
- Strengthened design's role across the lifecycle through **partnerships** with **Product**, **Engineering**, **Marketing**, and **Support**
- Stayed **hands-on** with user research, UX/UI design, and prototyping for **high-impact initiatives**
- **Designed key features**, unlocking B2B sales in commercial and workspace environment
- Rolled out new brand system and improved **accessibility**, achieving **WCAG 2.1** compliance across critical user flows

2020–2022

Senior Product Designer at EVBox

- Shipped **award-winning** work across EV charging hardware and software
- Simplified **end-customer onboarding** flow, increasing **task completion by 45%** and cutting **support tickets by 75%** within **3 months**
- **Led 0→1 design** of configuration experience of the next-gen charging stations, achieving 95% connectivity rate and streamlining technician workflows
- Gradually **improved** end-user **mobile experience**, increasing App Store rating from 3.2 to 4.4
- Conducted **100+ user interviews** and **usability tests**, plus multiple workshops and co-creation sessions
- Drove **design system** evolution, improving UI consistency and reducing new feature design time by **25%** through shared components and documentation
- **Partnered** with **stakeholders** to define and optimize user journeys, strengthening cross-functional alignment and delivery

2017–2020

Freelance Product Designer

- Launched **products** and **brands 0→1**
- Translated business goals and user needs into elegant, user-centred design solutions
- Created website and packaging design for a DTC product, contributing successful market entry and scaling online sales
- Conducted UX research and usability testing to inform product decisions and validate design concepts

2011–2017

Senior Product Designer at EPAM Systems

- Shipped **15+ impactful projects** across web, desktop, and mobile
- Collaborated with client design teams, product owners, and developers asynchronously across multiple time zones
- Mentored 5 junior designers

2008–2011

Visual Designer at EPAM Systems

- Designed web and mobile applications collaboratively within cross-functional teams
- Created wireframes, high-fidelity mockups, and interactive prototypes
- Collaborated closely with the development team

SKILLS

- Product Design, Web Design, Mobile apps, IoT
- UX Research, User interviews, Usability tests, Customer Journey mapping
- Advanced UX and interaction Design, incl. user flows, Wireframing, and Prototyping
- Advanced UI skills, incl. icons, illustrations, and animations
- Design systems, Accessibility
- 0→1, 1 → N, Design Strategy
- Cross-functional and async collaboration
